Experience

Frontend Developer Internship | Certificate   Sep 2022 – Oct 2022
Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

Frontend Developer Support   Aug 2022 - Current
Frontend Simplified

- Supported 1,000+ students using HTML, CSS, Flexbox, JavaScript and React best practises
- Utilized debugging best practises using Google Chrome inspect element tooling
- Simplified difficult programming concepts including responsive website development, CSS layout, Promises and API requests

Projects

Personal Website | Website | GitHub
- My personal website highlights my programming skills and contains the source code and website links for all my projects listed below.
- All projects built using **React, Java, HTML, and CSS** best practices.

Kive Cinemas | Website | GitHub
- Fetched data from TMDB API to allow users to view movie posters and additional information about any movie within the database.
- Implemented functional search bar and filters for results page.

Gmail Clone | Website | GitHub
- Includes composing and receiving composed emails using React-Redux. Used Firebase to store user generated data.
- Implemented Google-Sign-In using Google Authentication and React-Redux allowing the ability to display user's name and profile picture.

Ultraverse | Website | GitHub
- Fetched data from NFT API to allow users to view NFT art, collectors, and creators.
- Implemented animations and carousels using library integration.

Twitter Clone | Website | GitHub
- Implemented posting Tweets and live widget displaying data from twitter. Stored user generated data in Firebase.

Google Clone | Website | GitHub
- Integrated Google's API to create a real-world search engine.

Education

Frontend Developer Bootcamp   Aug 2022 – Sep 2022
Frontend Simplified

Technical Skills

Languages: HTML5 | CSS3 (+ SCSS, BEM) | JavaScript ES6+ | Typescript
Frameworks: React (+ hooks) | Material-UI | Redux
Technology: NPM | Yarn | Git | React dev tools | Firebase v9 | GitHub
